

# GLAZE

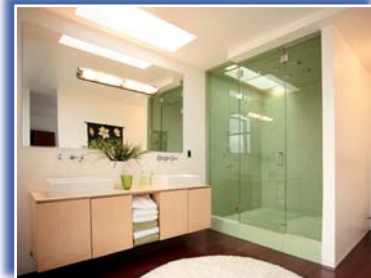

stick protective surfaces...

Without Vitroglaze, your untreated surface could eventually become permanently stained.

With Vitroglaze – You don't need to use harsh cleaning products or spend hours in the shower scrubbing... just one quick wipe daily and you're out the door!

# VITROGLAZE

The easy to clean non-stick protective coating for all kinds of surfaces...

The seemingly smooth surface of glass consists of microscopic ridges and valleys which, over time and with the use of harsh cleaners, allows the build-up of contaminants such as soap scum, body fat deposits, lime scale, hard water deposits and all manner of other grime – this makes the surface look dull.

Working similar to non-stick cookware, Vitroglaze makes surfaces easier to clean without the need for harsh chemicals.

With one permanent treatment, Vitroglaze can reduce your cleaning time by up to 90% so you can spend more time doing the things you enjoy!

Our professional on-site service is reliable, affordable, safe, efficient and part of the Future Proof Building network.

What does it mean to 'future-proof' a home?

Put simply, future proofing means incorporating into a new or renovated home features that will improve the occupants' quality of life now and ensure the home maintains and improves its value for the future.

This specialised home service is also backed by a lifetime warranty on new glass.\*

Don't worry that your glass isn't brand new! The good news is that Vitroglaze can also be applied to existing surfaces. In many instances glass can be restored to look like new, then have Vitroglaze applied.

**The process is simple, quick and leaves no mess – at very little inconvenience to you.**

\* Conditions Apply

*When we started building our new home a friend said the best piece of advice she could give was to have our showers Vitroglazed. When we saw how great they were we decided to have our glass table top, granite bench and a large glass balustrade around our deck done. Lisa was very professional and explained the process very well.*

*I have and will continue to recommend any new home builders to make sure they use Vitroglaze before they start using their showers – before it's too late.*

*Annette Rhind, Christchurch*

*We had Vitroglaze applied to our shower by Matt in December 2007 – 6 months on and it looks as good as it did when it was brand new. The product is great. I always rinse the glass after each shower and a quick squeegee with my \$4 squeegee and most times I dry with the towel. It is recommended by Matt to wipe down with the towel but missing the odd one has not affected my shower. Once a week while I am in the shower I use the cleaner that Matt gave me with a cloth and wipe it down - it takes a couple of minutes. The product is very price competitive in the market and offered the same guarantees. I would recommend Vitroglaze definitely.*

*Mike and Tanya Rozen, Tauranga*
